Carmageddon is Coming

We’re on the cusp of the fastest, deepest, most consequential disruption in transport history
Every single major car company says they’ll have fully autonomous vehicles (no steering wheel or pedals) on the road before 2021

Waymo’s Early Rider Program debuts Driverless Cars in Phoenix
Introducing Uber Health, Removing Transportation as a Barrier to Care

Written by Chris Weber, General Manager, Uber Health
Twelve years ago, the idea that you could find out on your phone when your bus was going to arrive was mostly a fantasy; These days, if you can’t tell me *precisely* when my bus is going to arrive then you might as well not bother pulling it out of the garage in the morning.

--Joseph Barr, Boston DOT
Universal Mobility as a Service
Elements of *Universal Mobility as a Service*

1. Comprehensive
2. Affordable
3. Accessible
4. Livable

Many More!
A Typical Human Services Coordination Process

• Healthcare referral to transportation coordinator via emailed form (patient name, address, phone number, appt date/time, destination facility)
• T. coordinator determines whether in service area
• T. coordinator calls patient to confirm appt date/time and gather info about patient and transportation need
• T. coordinator enters contact info, referral info, appt. date & time => trip sheet
• T. coordinator emails or faxes to transportation provider
